

FAKE PRODUCTS

WHERE to find it

Most fake products can be found in Asia and the Middle East. Counterfeits range from copy-pasted websites and faked certificates to product falsification.

WHOSE Products

Due to unmatched quality and the world's highest approval level, Erne Fittings products can be used within a broad range of complex applications including those in the power, offshore, oil & gas, nuclear and chemical industries. This makes Erne Fittings one of the most copied brands in the business.

WHY to stop it

The results of falsifications are very often financial in nature or damaged relationships. However the most important consequence can be danger to human life, if the product quality does not keep its promises.

WHAT Erne does

Erne Fittings is "the safe connection" and that's why each suspected case is investigated internally and communicated to the customers. Furthermore, a global network of lawyers - all specialists in trademark law - assist in the detailed and comprehensive tracking of each and every attempt to violate Erne's copyrights.

HOW to proceed

If you have any doubts concerning the authenticity of Erne documents and/or products, or have any information regarding the violation of the trademark, please get in touch with your Erne contact person, ask your local distributor for further assistance or send an E-Mail to „check.certificate@ernefittings.com“.

THE SAFE CONNECTION
