Quality Policy @ Erne

We are committed to meeting all requirements that were agreed upon with our customers and partners.

We align our strategy with the organizational goals and context of the company.

We define quality objectives so that the company can continue to develop in a sustainable manner.

We are committed to continuously improving our Quality Management System.

We constantly monitor and improve our processes in order to achieve sustainable business success.

We see the continuous development of our products, manufacturing processes and services as an unending responsibility.

We provide our employees with the training and resources necessary to accomplish the required tasks.

We protect our employees from job related accidents and any unreasonable psychological strain.

We communicate safety and health in the workplace and seek dialogue with the worker‘s council and other relevant groups.

We seek to minimize the impact of our products and production plants on the environment.

We highly value information security within our IT system and protect our data from misuse and cybercrime.

We meet both legal requirements and those set forth by the standards.

We are „The Safe Connection“
